

# Autodesk

Experience how leading design technology is inspiring innovative manufacturers to create the future.

Autodesk cordially invites you and a guest to celebrate the opening of our newest Customer Briefing Center at Autodesk Manufacturing Headquarters in Lake Oswego, Oregon.

This new state-of-the-art briefing center was created as a space to inspire the best designers and manufacturers of today and tomorrow. Companies from around the world will travel to Oregon to experience, create and learn about the future of design software technology at the Autodesk Customer Briefing Center.

The grand opening celebration will be an evening of immersion into the most advanced Digital Prototyping technology available for the automotive, consumer product and industrial machinery markets. Be the first to experience how Autodesk's design software technology is inspiring innovative manufacturers to create the world's next-generation products in our hands-on interactive showcase.

Join us and experience:

- How the hottest guitars on the market are designed and sculpted
- A wheelchair that's improving quality of life for its users
- Digitally designing and testing your own golf club
- One of the world's most advanced remote controlled demolition robot arms
- And more ...

Autodesk has more than 6,000 employees globally and is a proud Oregon employer with 200 talented staff in our Lake Oswego office. We look forward to welcoming you!

Robert "Buzz" Kross  
Senior Vice President  
Autodesk Manufacturing Solutions
