

## Digital Wheelchair Photos

Two photos of your chair are required for easy installation of **MAGICWHEELS**<sup>®</sup> 2-gear manual wheels.

This helps us evaluate which one of many variations your model chair might be.

### What makes for good photos?

- ✓ A close image of the side of your chair where the wheel attaches. (See Example 1)
- ✓ A close up image of the same area taken from the back of the chair. (See Example 2)
- ✓ Photos should be taken in a well lit room without using a flash. If possible hold a ruler or tape next to mounting area when taking pictures. (See Examples 1 and 2)
- ✓ Digital photos should be at least 1 Megapixel in size.
- ✓ Please preview photos before sending to assure clear images.
